› The Institute of Sport and Exercise Sciences University of Münster

› RESEARCH

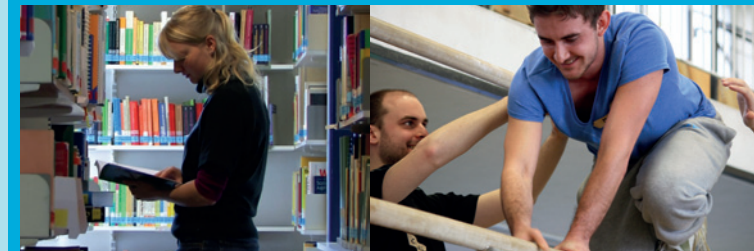

The Institute of Sport and Exercise Sciences has developed a strong research profile that deals with the topic sports from the viewpoint of humanities, natural sciences, as well as social sciences. It targets top-level research in high-performance areas for support and combines this with promoting first-class-junior staff.

Sport sciences stand for a wide range of scientific methodological approaches from historical orientated hermeneutic to experimental physics. A state of the art human movement lab offers a range of facilities for research on human action and especially sports-related movements in an interdisciplinary context.

In conclusion the Institute of Sport and Exercise Sciences differentiates between three main research areas:

Education | Expertise | Health

› GENERAL INFORMATION

The University of Münster (WWU) was founded in 1771 and is one of the largest universities in Germany. Currently the WWU is ranked 101-150 in the international Shanghai Ranking.

The Institute of Sport and Exercise Sciences is one of the leading sport science research and teaching facilities in Germany and takes one of the top places in the CHE Ranking.

› STUDYING

About 1500 students are currently enrolled in courses for Bachelor and Master of Education. A new international Bachelor of Science *Human Movement in Sports and Exercise* is planned for 2014/15. Language of instruction will be English.

Studying sport and exercise sciences in Münster involves many courses in practicing all different kinds of sports (individual sports, team sports, activity and health). Furthermore there are many theoretical courses from different fields of sport and exercise sciences.

The campus provides excellent training facilities with a recently build team sport hall and a new track and field stadium as well as numerous other facilities.
