

# IKMK Network

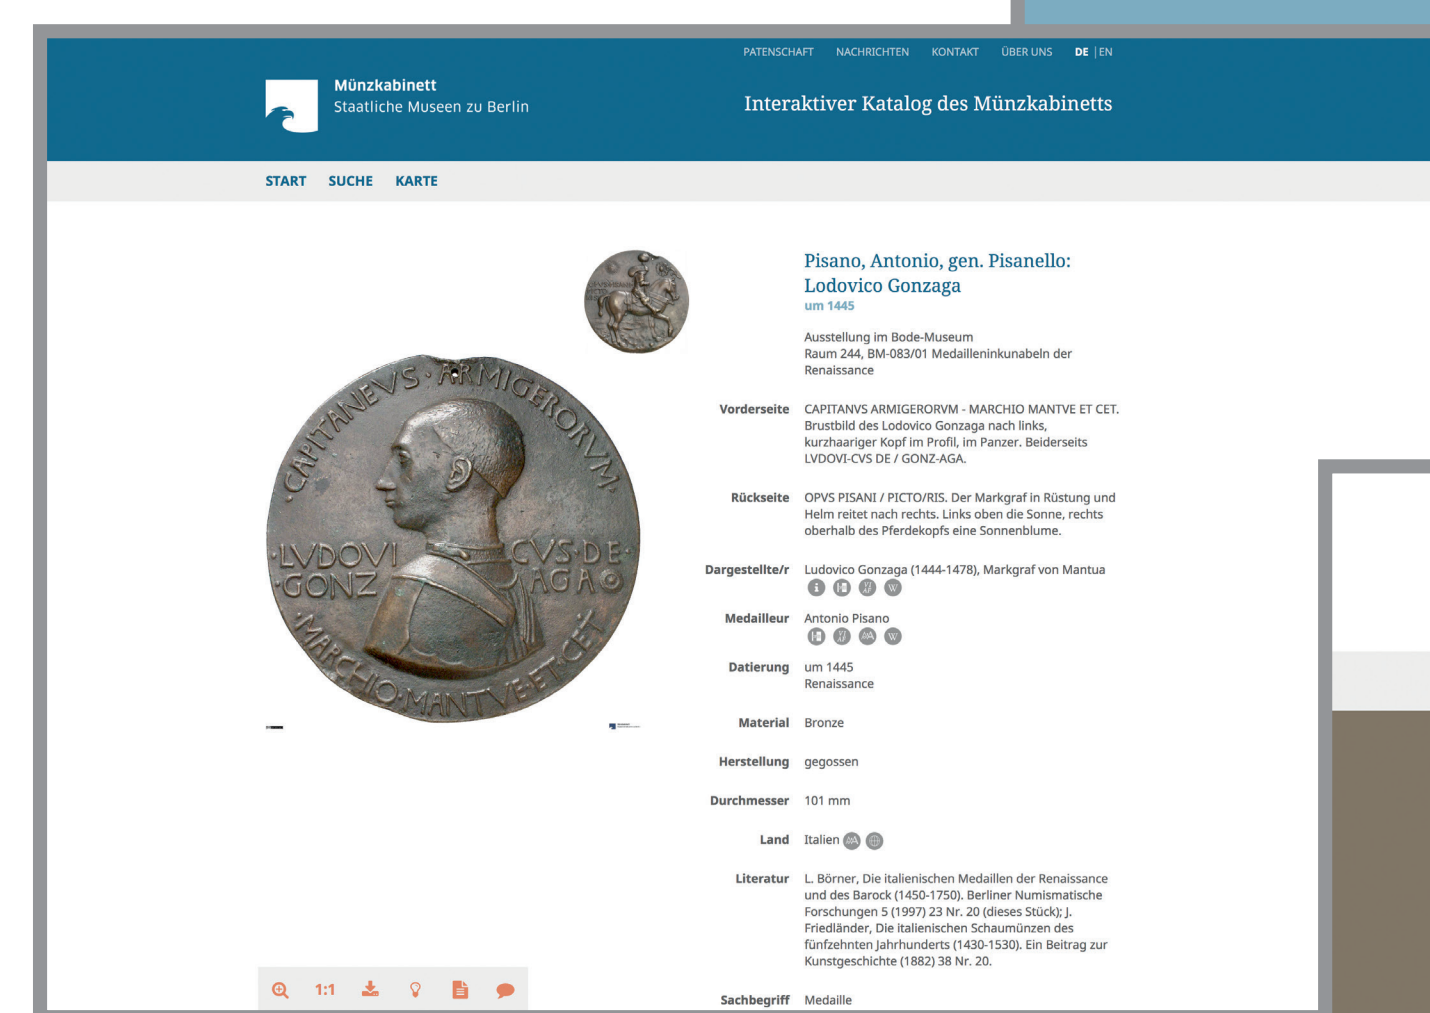

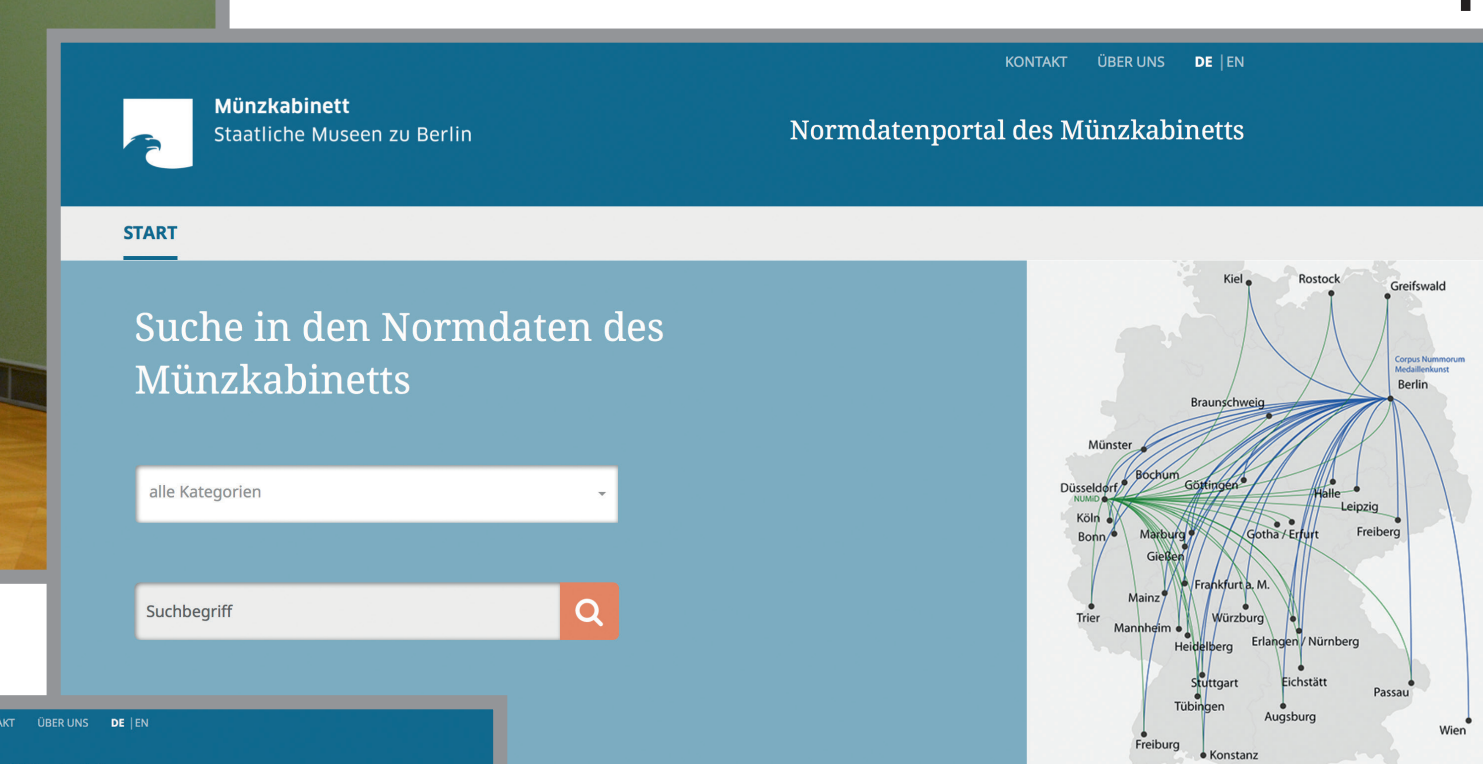

The **Münzkabinett online catalogue** and its partners

»» [ikmk.net](http://ikmk.net)

The online database of the Münzkabinett Berlin **ikmk.smb.museum** provides access to one of the biggest coin collections worldwide. Its main features are reliable, scientifically verified descriptions, legible to the non-numismatist, and the use of standardised terms and Linked Open Data (LOD) concepts in addition to high quality photographs, all readily available online.

[ikmk.smb.museum/ndp](http://ikmk.smb.museum/ndp)

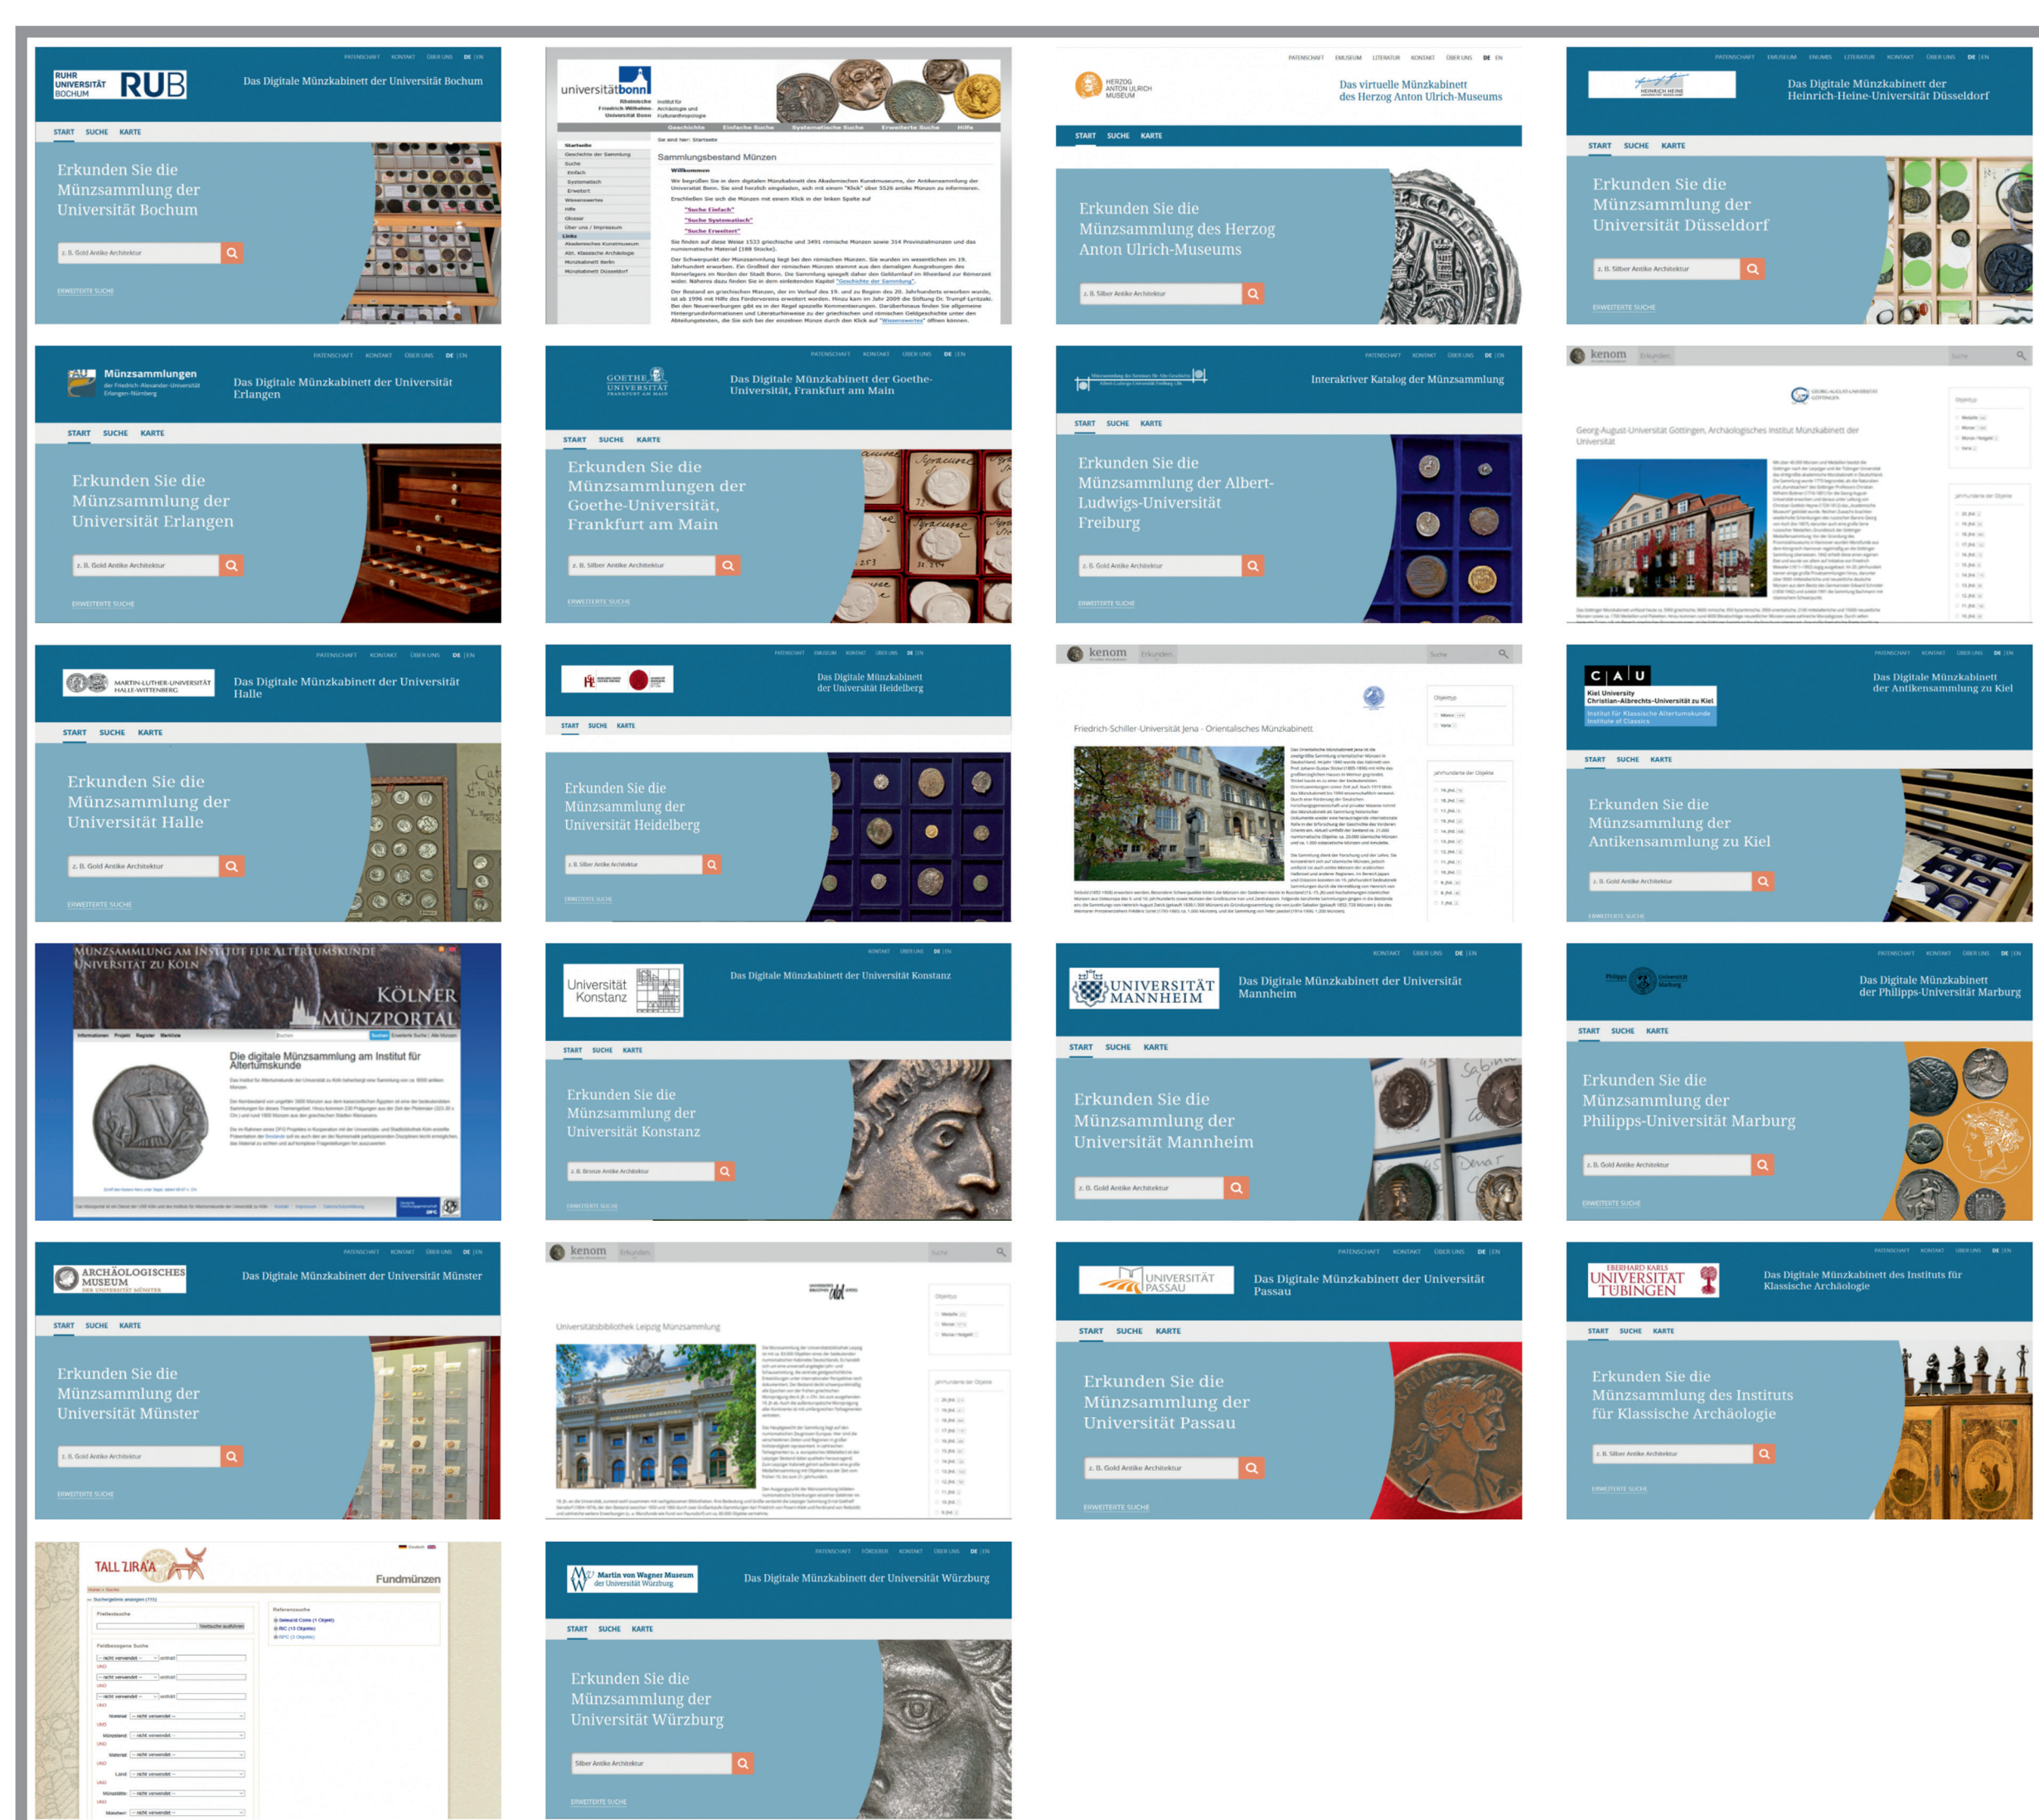

Local versions of this database are being provided to all partners of [ikmk.net](http://ikmk.net). Collections such as the Coin Cabinets in **Vienna** in Austria, **Winterthur** in Switzerland, the **NUMid-Verbund** of German University collections and others digitise their holdings using [ikmk](http://ikmk.net). Currently 31 museums constitute this network.

Concepts and identifiers used to describe objects are provided and edited by the Münzkabinett Berlin, accessible internally to all partners and externally to everyone online via the Normdatenportal (NDP) [ikmk.smb.museum/ndp](http://ikmk.smb.museum/ndp).

Our objective is the digital documentation of our numismatic cultural heritage through the collections who hold these objects, and combining these local online catalogues into one shared portal – [ikmk.net](http://ikmk.net) – to allow for searches and queries beyond institutional categories.

(IKMK = Interactive Catalogue Münzkabinett)
