Kolloquium des Mathematischen Instituts
(unterstützt vom Graduiertenkolleg und SFB 478)

am Donnerstag, 19.11.2009 um 16:30 Uhr, im Hörsaal M5, spricht

Professor Ruth Charney

(Brandeis University, Boston)

über das Thema:

„Right-angled Artin groups and their Automorphisms“

Abstract:

Associated to any Coxeter group is an infinite group known as an Artin group. The Artin groups associated to right-angled Coxeter groups have proved to be particularly interesting from both an algebraic and geometric viewpoint. We will discuss these groups, their automorphism groups, and their associated geometries.

Tee wird ab 16 Uhr im SR0 des Mathematischen Instituts serviert.
