

Fully Funded Alexander von Humboldt Postdoctoral Fellowship

Duration: 2 years

Location: Münster, Germany

Join the Biosphere-Atmosphere Interaction Research Group at the Institute of Landscape Ecology, Department of Geosciences, University of Münster, through Germany's most prestigious postdoctoral fellowship program.

Requirements for this position:

- A PhD degree in environmental sciences, atmospheric or climate science, hydrology, or a closely related field.
- Demonstrated experience with either of these fields:
 - novel gas exchange measurement techniques (experience with eddy covariance is an advantage)
 - mechanistic ecosystem modelling
- If selected, you will be nominated as an international “talent“, thus an excellent track record is required.
- Eligibility is limited to those who have neither studied nor worked in Germany previously.

Application process: send a cover letter and CV including list of publications in a single PDF document to Prof. Mana Gharun mana.gharun@uni-muenster.de

Application deadline: 20 September 2024

Starting date: upon agreement and as early as 4 weeks after selection.
